CAREER OBJECTIVE

Seeking to grow into a skilled offensive security professional specializing in web application penetration testing and vulnerability research, with the long-term goal of contributing to red-team operations and advanced adversarial security work.

EXPERIENCE

ThreatWorx *Dec 2025-Present*

Intern

- Developing a prototype vulnerability data visualization tool in Python that aggregates organizational security assessment findings via the ThreatWorx API, with ongoing work to implement time-based and category-specific filtering.

PROJECTS

Active Deception Framework — Web Attack Detection *Jul 2026 - Present*

- Conceived the project's core idea — using response-side "bait" probes and a consistent decoy environment to actively provoke and identify attackers instead of passively waiting for evidence
- Owned offensive testing: simulated real-world attacks (SQL injection, IDOR, SSRF, credential stuffing, CSRF) against the team's target application, including browser-driven and LLM-agent adversaries, to build the attack corpus and stress-test the detection engine
- Contributed to an evaluation across 99 seeded trials (11,880 attack sessions) showing detection recall rising from 88.9% to 94.3% with zero false positives on benign traffic

Audio Steganography & Crypto Tool *Jul 2025 - Nov 2025*

- Built a command-line Python utility utilizing Fast Fourier Transform (FFT) to inject and extract encrypted payloads within WAV frequencies
- Implemented custom Base64-to-frequency mapping algorithms to obfuscate text strings, simulating real-world data exfiltration techniques

EDUCATION

B.E. in Computer Science, Specialization in Information Security Session: 2023-2027

Chandigarh University, Mohali, Punjab (INDIA) | CGPA: 7.58

TECHNICAL SKILLS

Languages: Python

Security Tools: Burp Suite, Wireshark, Nmap, Metasploit, SQLmap

Environments & Tools:, Linux (Kali), Postman

SOFT SKILLS

Critical Thinking | Problem Solving | Emotional Intelligence | Interpersonal Communication

ACHIEVEMENTS

- **TryHackMe** — Ranked **Top 4%** globally | 115 rooms completed | 321-day streak | TryHackMe
- **Hacker Holidays** — Successfully completed gamified hacking challenges across Web App Sec, AI Security, Cloud Security, Digital Forensics, OSINT.
- **Top 50 Finisher – TryHackMe 'Love at First Breach' CTF (2026):** Successfully completed advanced gamified hacking challenges across Web App Sec and AI Prompt Injection to secure a top event prize
- **E-Suraksha Hackathon (2023):** Placed top ten in E-Suraksha Hackathon all over India.

CERTIFICATIONS & AWARDS

- Microsoft SC-900: Security, Compliance, and Identity Fundamentals
- Cybersecurity-101: TryHackMe
